

## Public Education

The Town of Boone has adopted a water conservation education program to support its philosophy of managing the environment in a manner that does not despoil, exhaust or extinguish water, our natural resource.

One of the primary goals, of Every Drop Counts, is to inform and educate the community on water conservation methods. Please contact the Public Utilities Department if you are interested in using or participating in any of these programs, or if you have questions concerning the conservation of water, our natural resource.

### Every Drop Counts PowerPoint Presentation: Conservation and Education

This presentation is approximately 20 minutes long and is perfect for civic groups, church organizations and students. When available a member of our conservation team will assist and deliver the presentation. Organizations may also come by and check out a presentation kit.

Please contact: Lane Weiss  
Program Coordinator  
(828) 268-6250
